6. Course Data Setup.

In this video we will see How yo to Setup the database on which we will work in this whole course.

you will find 2 files:-

1. create - course - data · txt
2. delete - all - data · txt.

in this Neo4j course approach is bit different, first we perform Operation on database like MATCH, AGGREGATE QUERIES, DELETE and many more,

And after that we will see the creation of Nodes, properties & Relationship

Step-1 Open Neo4j Browser

Step-2 Open ⭐ Favourite section.

Step-3 Open folder in which 2 files are put, drag them to import section (or any part of frame)

step-4   ALL SET ! ! ! (Now main course begins).

So, our database setup is completed, in the next section we will see Basic Queries

If you are getting data output bit different, you Have to delete all the Scripts by pressing ▶ front of delete - data · txt .
